HOW TO READ THE RATINGS

Business schools in each category have been placed in an alphabetical order. That is why, in the Super League 1, Indian Institute of Foreign Trade, New Delhi, is on top and XLRI, Jamshedpur, is at the bottom, although on the basis of the overall score, it could have been different. Similarly, in other categories, this could have resulted in business schools with a lower overall score to be listed above those with a higher overall score.

The survey for the rankings uses a combination approach — self-audit by the institutes and an external

rating by industry. The audit module was refreshed to take into account the changing dynamics of the market, and each parameter has been relooked at to make it more relevant.

The scores given in the table represent percentile scores. Scores have been allotted on two broad parameters:

- Audit scores under six parameters
- Perception scores

Each parameter has been assigned a different weight according to the directions of an expert committee. The final score is therefore a weighted aggregate and not a simple aggregate. The final scores are used to put

the business schools in different categories. No mathematical operations like addition or subtraction can be done on these scores.

The grouping in each category is on the basis of absolute scores and not percentile scores. That is why, you will find, that business schools with a score of 90 are in the Super League 2 as well as in the A1 and A2 categories. Similarly, business schools with an overall score of 80 can be found in the A3 and A4 categories. Following the same logic, business schools with an overall score of 70 can be found in the A5 and A6 categories.
